

PARTS INFORMATION

BMW E28 5 Series & E24 6 Series

Part #'s 11 81 1 128 932 and 11 81 1 175 735

The motor mount part number 11 81 1 128 932 (cylinder shaped mount) was originally designed for the BMW M5 and M6 as more of a high performance motor mount.

The motor mount part number 11 81 1 175 735 ("V" style motor mount) was originally designed for all other standard versions "non-performance" models such as the 528e, 533i, 535i (E28), and 633csi, 635csi (E24).

The 11 81 1 175 735 a relatively softer mount has been discontinued by Meyle and has been superseded to the cylinder style high performance version mount part number 11 81 1 128 932.

The cylinder style mount although designed differently will fit perfectly into all E28 and E24 version applications and will last longer and perform better than the older "V" style motor mount.
